

Tuesday 12th September 2017

Dear Parents/Guardians

At Princeville Primary School, we want staff, children, parents and carers to create a school community that embraces the use of new technologies. We promote the use of ICT to enhance learning and thinking and teach all of our children how to keep themselves safe online.

Last academic year children in Years 3, 4, 5 and 6 worked alongside the Bradford District Cyber Safety Team to understand how to stay safe online and how to report incidents and problems confidently and straight away.

As a school we know many children use computers to play games and for some form of social media. We want to encourage you to ensure children are supervised at all times at home, especially when accessing the internet and be aware of some of the potential dangers that could arise from the use of social media. Therefore, we have asked for Izac Spencer, who is part of the Cyber Safety team to deliver a workshop on Cyber Awareness for parents.

The workshop will be held on **Monday 18th September at 9am in the Dining Hall**. We hope that you can attend and continue support us in ensuring our children are safe online.

Thank you for your continued support

Mrs N Majid
Deputy Headteacher
